- **Relevant Coursework:** Security and Investment Analysis, Money and Banking, Corporate Finance, Econometrics, Statistics, Microeconomics, Macroeconomics, Calculus 3

WORK EXPERIENCE

New York City Housing Authority (NYCHA), New York, NY

Feb 2026 – Present

Accounts Payable, Community Associate

- Processed and entered data from 100–150 invoices daily into Oracle E-Business Suite, pulling from three key queues: Other, Regular, and Contract.
- Matched invoice totals with corresponding release amounts to ensure payment accuracy and compliance prior to approval.
- Managed high-volume workflows supporting the Prevailing Wages team, applying strong organizational, problem-solving skills, and attention to detail to maintain accuracy under pressure.
- *Promoted from Accounts Payable Intern to fulltime Community Associate.*

DRT International Logistics, New York, NY

Jul 2022 – Nov 2024

Logistics, Operation Assistant

- Created new client accounts and assisted in client satisfaction by reliably communicating hundreds of arrival notices, shipment updates, and minor service issues.
- Developed and implemented a shipment management plan with managerial guidance.
- Processed data on shipments using online operations systems such as GoFreight, maintaining detailed documentation and spreadsheets to facilitate freight operations.
- Assisted in transaction inputs of invoices for shipments and ensured invoice documentation was included with arrival notices to support billing accuracy and client communication.
- Tracked container free time, ensuring compliance with container deadlines, reducing storage costs, and avoiding per diem fees through proactive monitoring and detailed analysis.

CERTIFICATIONS

Introduction to R Programming for Data Science

IBM

Coursera

Oct 2025

SQL for Data Science with R

IBM

Coursera

Oct 2025

- Executed SQL queries (JOINS, filtering, sorting, aggregation) to extract and analyze structured data. Integrated SQL with R to run database queries and perform further data analysis and visualization.

Data Visualization and Dashboards with Excel and Cognos Analytics

IBM

Coursera

Feb 2026

- Built interactive dashboards and applied Excel features including Pivot Tables, VLOOKUPS, and Conditional formatting to summarize and visualize complex datasets.

Data Analysis with R

IBM

Coursera

Feb 2026

- Performed exploratory data analysis and statistical summaries using R to identify patterns in datasets. Cleaned and transformed data using R packages to prepare datasets for analysis.
